

**Your partner in plastics**

# Acrylic glass production using the latest technologies of *MultiCam*

## Laser MultiCam 2000 series

- board materials laser cutting (acrylic up to 25 mm, steel up to 4 mm of thickness)
- cutting of other materials except PVC and aluminum
- laser raster engraving
- desktop size 3048 x 2032 mm, performance 400 W

## CNC MultiCam 3000 series

- machining of plastic board materials up to thickness of 35 mm
- engraving
- tooling with special tools using 11-place automatic buffer
- desktop size 3048 x 2032 mm, vacuum material fixing

The Laser MultiCam 2000 Series technology starts on 20th January 2008

Our company offers:

- **overall acrylic glass processing technology**
- **custom production**
- **processing of other plastics**
- **vacuum moulding of plastics**
